## **User Stories of Seller (Micro - E-comm Web Application)**

### **Epic 1 : Registration**

As a seller, I want to be able to register with Email, Name, Password so that I can start selling my items.

#### **Acceptance Criteria**

- The registration form should be accessible from the seller registration page.
- The registration form should require the following fields: Email, Name, and Password.
- The Email field should only accept valid email addresses.
- The Name field should only accept alphabetical characters with a minimum length of 5 and maximum length of 20 characters.
- The registration form should provide error messages if any of the required fields are not filled out or contain invalid input.

As a Seller,

I want to be able to create a strong password,  
so that my account is secure.

#### **Acceptance Criteria**

- The Password field should require a minimum length of 8 characters, including at least one uppercase letter, one lowercase letter, one number, and one special character.
- The registration form should provide error messages if any of the required fields are not filled out or contain invalid input.

### **Epic 2 : Login**

As a seller,

I want an option "Forget password",  
so that I can create a new password, if i forget my password.

#### **Acceptance Criteria**

- In buyers login page they will be able to click on the forgot password option.
- It will be redirected to forgot password page.
- In the forgot password page buyer need to enter already registered email id.
- Then they will be allowed to enter new password and re-type new password.

### **Epic 3: Logout**

As a seller, I want the ability to log out of my account securely so that I can protect my privacy and prevent unauthorized access.

#### **Acceptance Criteria**

- The system should provide a clear and visible "Log Out" button or link on the user's dashboard or profile page.
- When the user selects the "Log Out" button or link, the system should prompt the user to confirm that they want to log out.
- After the user confirms that they want to log out, the system should immediately terminate the user's session and return them to the login page.

### **Epic 4: Items List**

As a seller, I want to be able to edit [add, delete, modify price, insert image] the details of my items, such as the price, description, or quantity, so that I can keep my inventory up-to-date and accurate.

#### **Acceptance Criteria**

- The seller should be able to edit the details of their items, including the price, description, and quantity, from their seller dashboard.

- The seller should be able to add new items to their inventory, including uploading images and providing a description and price.
- The seller should be able to delete items from their inventory.
- The seller should be able to modify the price of their items.
- The seller should be able to modify the description of their items.
- The seller should be able to modify the quantity of their items.
- The system should validate all input to ensure that it is valid and meets the necessary requirements (e.g., price must be a positive number, description must not be empty, etc.).
- The system should provide clear and concise error messages to the seller if any input is invalid.
- The system should provide a confirmation message to the seller after the changes have been saved.
- The system should display a warning message to the seller if they attempt to delete an item that has existing orders associated with it.
- The system should allow the seller to cancel the deletion of an item if they choose to do so.

As a seller, I want the item list feature to be user-friendly and intuitive, so that I can easily manage my inventory and focus on growing my business.

#### **Acceptance Criteria**

- The item list should be easy to navigate and understand.
- The item list should display all necessary information, including item name, quantity, price, and status.
- The system should allow the seller to easily add, edit, or delete items.
- The system should allow the seller to easily filter and sort the item list.

### **Epic 5: Ordered List**

As a seller, I want to be able to view a list of my orders, so that I can see the current status of each order and manage my sales.

#### **Acceptance Criteria**

- The seller should be able to view a list of their orders from their seller dashboard.

- The list of orders should include the order number, customer name, item name, quantity, price, and current status.
- The system should provide a way for the seller to view the details of each order, including the customer's shipping address and payment information.
- The system should provide a way for the seller to update the current status of each order.
- The system should provide a way for the seller to cancel an order if necessary.

As a seller, I want to be able to view a list of my payments details, so that I can see the revenue of each order and manage my sales.

#### **Acceptance Criteria**

- The seller should be able to view a their payments details from their seller dashboard.
- The list of payments details should include the payment date, order number, customer name, item name, quantity, price, and total revenue.
- The system should display the total revenue generated from all orders in the list of payments details.

### **Epic 6: Profile**

As a seller, I want to be able to view and edit my profile information, such as my name, email address, and password, so that I can keep my account up-to-date and secure.

#### **Acceptance Criteria**

- A seller should be able to view their profile information, including name, email address, and password.
- A seller should be able to edit their profile information, including name, email address, and password.
- The system should validate the new email address to ensure it is unique and not already in use.
- The system should validate the new password to ensure it meets the minimum security requirements.

- The system should display a confirmation message upon successful profile update.

As a seller, I want to be able a customer support option, so that I can describe my issue that need to be rectified by the admin.

### **Acceptance Criteria**

- A seller should be able to access a customer support option from their seller dashboard.
- When the seller selects the customer support option, they should be presented with a form to describe their issue.
- The form should include fields for the seller to enter their name, email address, subject, and a detailed description of their issue.
- The system should validate the form input to ensure that all required fields are completed and that the email address is valid.
- The system should send an request to the admin when a new support request is submitted.
- The system should display a confirmation message to the seller upon successful submission of their support request.
